Lake Superior
10% Of The Worlds Fresh Water
Elevation = 602 Feet Above Sea Level
Maximum Depth = 1,332 Feet
Retention/Replacement Time = 191 Years
Kitchi-gummi, A Ojibway Indian Translation,
Signifies Great-Water Or Great-Lake

The City of Marquette
has 6 miles of public beaches.
Lets keep our beaches/lake clean and healthy,
please take home what you bring to the shore.

The City of Marquette storm water drainage system
is responsible for carrying all water from
city streets to Lake Superior. Storm
drains do not send water to a treatment
facility where it is cleaned. That means
the water and everything it touches –
from dirt, motor oil, trash and pet
waste – flows straight into Lake Superior!
Many storm drains are being marked
with a "storm drain marker", pictured below,
to remind people not to litter or put anything
down a storm drain.
