CURRENT CONFIGURATION

What is Being Done?

The City of Marquette is constructing roundabouts at the intersections of Grove and US 41, the new hospital access drive and US 41 and Baraga Avenue and the new hospital access drive.

When Will This Be Done?

The project is scheduled to begin in April and to be completed in October of 2017.

How Will Traffic Be Affected?

The project will require lane closures at the intersections and traffic shifts. Access to local businesses will be maintained during construction. The project will require intermittent closures on Seventh, Baraga, Grove, and Spring Streets with posted detour routes. Seventh Street will be closed to through traffic to US 41 for the duration of the project. The work zone on the local streets will generally remain open to pedestrian traffic. Slight delays are expected, with longer delays anticipated during peak traffic periods on US 41. Some nighttime paving work can be expected.

Long-term Benefits

The project will improve safety at these intersections, reduce motorist delay, and improve ride quality.

FUTURE CONFIGURATION
