PRESQUE ISLE PARK PLAYGROUND

The City of Marquette invites participation in a meeting to review plans for a new Presque Isle Park playground.

Plans are moving forward for a new destination playground at Presque Isle Park. The proposed playground will be accessible and inclusive for children in the 2-5 and 6-12 year age groups. Inclusive design means the entire playground will be completely accessible and can be enjoyed by children of all ages and abilities, regardless of special needs, physical and cognitive disabilities. The plans also call for improved parking, gateways, fencing, seating and viewing areas, as well as environmentally appropriate landscape and sustainability features. A nature-based theme and soft colors are being proposed.

The City of Marquette invites the participation of interested community members to attend an upcoming meeting to see and hear about the playground plans and provide comments and suggestions. This meeting is scheduled for Wednesday, January 9, 2013, at 6:00 p.m. at the Marquette Commons building, 112 S. 3rd Street in Marquette.
