MARQUETTE COMMUNITY RECYCLING SURVEY

In the coming weeks, residents of the City of Marquette should expect a community recycling survey to be included with their utility bills. The survey has been prepared by students in the *Human Impact on the Environment* class at Northern Michigan University this fall. The students' main goal is to gather information on community recycling habits and make recommendations for improvement. Residents may return this survey by mail with utility bills, drop off at City Hall with utility bills or respond via online survey at <http://bit.ly/1KD1SSZ>. Survey results are anonymous and no personally identifiable information will be gathered.
