REDUCED TRAFFIC ON BARAGA AVENUE

The Duke Life Point Hospital construction project at 850 W. Baraga Ave. (between McClellan Avenue and 7th Street) is underway. During the construction, the section of Baraga Avenue adjacent to the project will be in rugged condition and experience increased traffic due to construction vehicles. A portion of the road has been turned to gravel. Reduced speeds are recommended for motorists using this section of road.

While all businesses remain open and accessible from either direction, it is recommended that through traffic find alternate routes until the construction is complete.
