HIGH AMOUNT OF CONSTRUCTION TRUCK TRAFFIC EXPECTED

The City of Marquette is experiencing a large amount of construction this year. Large construction and demolition projects are being performed for the Marquette Area Public Schools, Marquette Board of Light and Power, Northern Michigan University, Duke Life Point Hospital and the City of Marquette, in addition to the many smaller seasonal construction projects performed during our short U.P. construction season.

Commercial trucks are allowed to travel on streets normally designated as "truck traffic prohibited" when traveling a direct route to and from a site where they are conducting business, which includes construction sites.

Construction truck traffic can be expected in many areas of town this summer where residents would normally not experience construction traffic.
